

SAINT ASV (Approved Scanning Vendor)

Make PCI Compliance Easier to Manage.

Protecting payment card data requires more than passing a quarterly scan. You need clear visibility into vulnerabilities, a reliable process for resolving findings, and confidence that your environment continues to meet PCI DSS requirements. SAINT ASV helps simplify that process so you can focus on reducing risk while protecting customers and maintaining compliance.

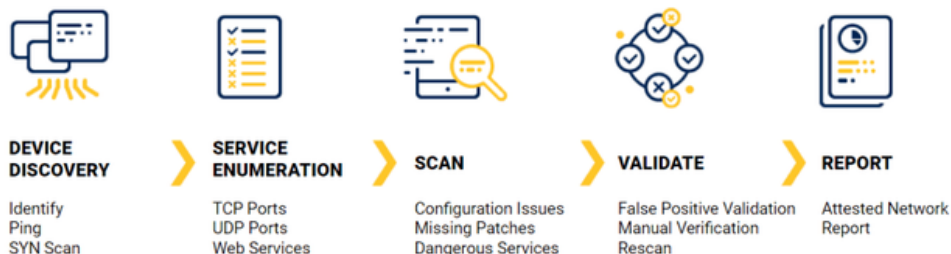

PCI Compliance with SAINT ASV

As a PCI Approved Scanning Vendor, SAINT helps you identify vulnerabilities across internet-facing systems and complete the external scanning required for PCI DSS compliance. From initial discovery through validation and attested reporting, you gain a structured process for understanding findings, correcting issues, and demonstrating compliance.

More Than a Quarterly Checkbox

Quarterly compliance should not mean quarterly visibility. With the SAINT ASV portal, you can scan in-scope assets more frequently to identify and address issues before your next required assessment. Ongoing scanning helps you maintain compliance between quarterly scans, resolve potential findings sooner, and reduce the risk of disputes or compliance deficiencies during the Attestation of Scan Compliance (AoSC) process.

A Clear Path from Scan to Attestation

Flexible. Clear. Built for Ongoing Compliance.

Your compliance program should not stop once a scan is complete. SAINT ASV gives you a secure, easy-to-use portal for managing scans, monitoring in-scope systems, reviewing vulnerabilities, and generating required reports.

- Run required quarterly external vulnerability scans.
- Scan on demand between compliance cycles.
- Review and remediate actionable vulnerabilities.
- Validate findings and resolve potential false positives.
- Generate reports for PCI attestation and internal review.
- Get assistance when failed scans require dispute resolution.

At a Glance

- PCI Approved Scanning Vendor since 2008
- Flexible scanning for one host or hundreds of targets
- Unlimited scans and flexible reporting
- Secure web-based management portal
- Internal and external vulnerability scanning support
- Penetration testing and compliance services
- Ongoing monitoring between required scans
- Support through remediation and dispute resolution
