

SAINT Risk Navigator

Organizations need more than vulnerability data. They need clear insight into where cyber risk exists, which threats require immediate attention, and how security efforts support business objectives. SAINT Risk Navigator transforms vulnerability management into risk-informed decision-making, helping organizations reduce cyber risk, strengthen resilience, and focus resources where they deliver the greatest impact.

Risk-Based Prioritization

Focus remediation efforts on the vulnerabilities that present the greatest business risk.

Business-Focused Insights

Translate technical findings into meaningful risk information for security teams and leadership.

Simplified Compliance

Reduce audit preparation time with automated reporting and built-in compliance frameworks.

Faster Time-to-Value

Deploy quickly and begin identifying, prioritizing, and reducing cyber risk immediately.

Your Current Challenges

Too Many Vulnerabilities

Security teams struggle to determine which findings require immediate action.

Growing Compliance Demands

Regulatory requirements continue to expand while reporting expectations increase.

Limited Visibility

Disconnected tools make it difficult to understand overall cyber risk.

Resource Constraints

Security teams must accomplish more with limited time and personnel.

Most reliable vulnerability management platform

The suite's ease of deployment, detailed risk scoring, and continuous vulnerability monitoring set it apart from competitors that may focus on either scanning or reporting alone.

SAINT Risk Navigator

Use Cases:

SAINT Risk Navigator helps organizations reduce cyber risk across a variety of scenarios. Prioritize remediation for PCI DSS compliance, accelerate recovery after security incidents with risk-based insights, and strengthen security awareness by identifying human-factor risks and improving employee resilience.

SAINT Risk Navigator helps organizations reduce cyber risk by prioritizing vulnerabilities according to business impact, asset criticality, and threat intelligence. Centralized dashboards provide a clear view of risk while automated reporting simplifies compliance and executive communication.

Built on your existing SAINT environment, Risk Navigator delivers rapid value through automated asset discovery and out-of-the-box configurations. Customizable risk scoring and business-focused reporting help security teams make informed decisions, allocate resources effectively, and demonstrate measurable progress toward reducing organizational risk.

The SAINT Risk Navigator Process

1. **Discover:** Identify assets and gain visibility across your environment.
2. **Assess:** Evaluate vulnerabilities and understand your organization's risk exposure.
3. **Prioritize:** Focus remediation efforts on the risks with the greatest business impact.
4. **Remediate:** Take action with clear, risk-based remediation guidance.
5. **Verify:** Confirm vulnerabilities have been resolved through automated validation.
6. **Report:** Communicate progress with customizable reports for technical and executive audiences.

Why Choose Us

- ✓ **Business-Driven Security:** Supports better decisions by connecting cyber risk to business priorities.
- ✓ **Immediate Operational Value:** Rapid deployment delivers meaningful security insights from day one.
- ✓ **Simplified Compliance:** Automates reporting and helps organizations stay aligned with evolving requirements.
- ✓ **Smarter Risk Prioritization:** Focuses attention on the vulnerabilities that matter most.
- ✓ **Built to Scale:** Adapts as your organization, infrastructure, and security program grow.
- ✓ **Continuous Risk Reduction:** Supports ongoing improvements that strengthen cybersecurity over time.
- ✓ **Trusted Expertise:** Backed by experienced cybersecurity professionals and proven solutions.

About Us

Founded in 1998, Carson & SAINT helps organizations reduce cyber risk through innovative cybersecurity products and expert services. Our business-focused approach enables customers to strengthen resilience, protect critical assets, and meet evolving regulatory requirements with confidence.
